ABOUT ME

Full Stack developer based in Tokyo on a working visa.
I lived in 3 different countries, and have more than 2 years
experience in IT and tech related work.
My skills go from front end – HTML / CSS, React / Stimulus to back
end – PostgreSQL, Ruby on rails.

PROJECTS

WHAT DO I WEAR
· Ruby on Rails project – Uses AI to find clothes from a picture and
keep them in a "online closet"
· *Tech used : Rails – HTML / CSS – Javascript / Stimulus –
PostgreSQL*
· My role in the team : Scrapping Clothing website data and
integrate the AI in the APP to find similar clothes – Making some
front end components and switching clothes function,

CAMERA BUDDY
· Ruby on Rails project – Airbnb like App where you can rent
cameras or rent out your camera.
· *Tech used : Rails – HTML / CSS – Javascript / Stimulus – PostgreSQL*
· My role in the team : Structuring the Database – making the home
page – making the index page and integrate the map with
geolocalisation of cameras.

CAFE API
· Rails and React project – API with cafes around Tokyo built with
Rails and front end using this API built with React.
· *Tech used : Rails – React Javascript*
· Solo project

WORK EXPERIENCES

· 2022 / 2024 – ENGLISH TEACHER at British Culture Academy
English teacher for Kindergartens and Nurseries

· 2021 / 2022 – HARDWARD ENGINEER at パソコン直したい
Repairing customer's hardwares

· 2017 / 2019 – PRINT / WEB DESIGNER
Very small company, therefore, I had to manage projects from
beginning to end and take on full responsibility.
Created a website to promote the company's events and videos and
then updating it, extend it then to Social medias and do all the
community management work.
